To whom it may concern

I am delighted to make this recommendation for Dr. Roopa Seshadri, whom I have known over the last five years. We had worked together at Fortis Hospital, Bannerghatta Road, Bangalore.

Dr. Roopa is a strikingly dynamic doctor, who has excelled in Neuro-endovascular interventions and Stroke management, along with general Vascular Interventional work, over many years. She has trained under the best experts in premier institutions in Bangalore and Paris. She has presented papers in International conferences, has been visiting faculty in prestigious institutions. She takes great care to study her cases and to do the best for her patients. She is able to foresee adverse events, before they actually happen and is expert at preventing them well ahead. She has a wide knowledge of techniques and treatment methodologies.

I am impressed with her keenness to discuss complex cases and learn from other experienced experts, at any stage of care of her patients. She is very generous with her knowledge and expertise and is someone who is always willing to share and train whoever is keen to learn.

I have no doubt that if she should be given an opportunity to do the MAS Degree (Master of Advanced Studies in Stroke Medicine), she would be a great point of learning for many others, through her excellent communication skills and generosity of heart.

Dr. Chandran Gnanamuthu.
